Serious incident report, draft

EU AI Act Article 73: serious incident report draft

Incident inc_01KZCD6D7G58RC2Q4DRZWPY2VQ (latency_p95 on target-gateway) was detected by rule 'latency_p95', affecting: target-gateway. 1 action(s) were executed toward remediation. The incident's autonomy level was recorded as 'auto', with a measured time to resolution of 7 seconds. No human approval or veto was recorded; every executed action cleared automated policy at green or yellow tier without needing sign-off. This section demonstrates the evidence shape AEGIS produces for a serious-incident report; it is a draft starting point, not a completed regulatory filing, and no compliance claim is made.
